Thanks very much Lance.

Dana, just a heads up on upcoming field work and gasco preRD coordination.

Have a good weekend, all.

**Subject:** FW: Call me as time permits

Sean, here is a brief summary of my call with Ryan Barth on 3/14:

Status of comments on dredging and cover closeout approaches presented to TCT by NWN/Anchor back on 2/27: I told Ryan that TCT comments were being compiled and they should be available soon. I also found out that DEQ is still reviewing the pptx and expects to have some high level comments by early next week. I shared the 5 Tribes comments and Paul Schroeder's opinion with Dana to help DEQ focus their comments.

Access to EPA comments on pre-RD Group FSP's: Ryan now has the info sent to Bob Wyatt so no action on this. NW Natural plans to use the approved Pre-RD scopes to inform their data gaps work (don't want to duplicate effort if the Pre-RD data is usable and available in timeframe needed).

Functional Structure Determination: Ryan asked what the ROD 50 year design life means with regard to the Gasco dock; i.e. what is needed for the record (engineering evaluation, etc.)? Anchor will be providing a map/info on the structures they think are functional. CDM Smith will take a look

at the information and provide an option to EPA.

Upcoming fieldwork: NWN wants to get another set of seepage meter data in the mid May-early June timeframe (during high river flow timeframe). A memo will be coming to describe the work in the next couple weeks.

Lance

Lance, if you have time, could you give Ryan a call? I won't have time until Thursday or Friday.

Thank you.

I left you a voice mail today on your cell phone. As time permits, please give me a ring on my cell phone (206-719-3605) to discuss a few path forward questions on Gasco and the Pre-RD Group baseline monitoring. Thanks.

Ryan Barth, P.E.
